**PROJECTS**

**FilmLog** **Next.js, Prisma, SupaBase, OAuth** [Visit Repository](#) | [View Project](#)

- Developed a comprehensive full-stack CRUD application enabling users to manage and track their film rolls throughout the shooting process.
- Implemented OAuth authentication to ensure secure user logins and maintain data separation.
- Utilized the Prisma ORM to seamlessly connect the front end with a PostgreSQL database hosted on SupaBase for robust data management and retrieval.

**BooleBots** **React, ChakraUI, SCSS** [Visit Repository](#) | [View Project](#)

- Spearheaded the development of BooleBots during Voyage 44 for [Chingu](#). Collaborated effectively with a diverse group of developers based in the US, Canada, Argentina, and Brazil, ensuring successful coordination and project delivery.
- Designed a dynamic game where bots, representing Boolean values of true or false, engage in battles whose outcomes depend on global Boolean operations such as AND or OR.
- Successfully implemented gameplay mechanics where the victorious bot continues to navigate the board while the defeated bot disappears, resulting in an engaging and educational gaming experience.

**Hearthstone Encyclopedia** **React, Tailwind CSS** [Visit Repository](#) | [View Project](#)

- Developed a comprehensive database utilizing the official Hearthstone API, containing detailed information on all cards featured in Blizzard Entertainment's popular game Hearthstone.
- Designed card detail pages providing users with extensive information such as class, minion types, flavor text, rarity, and related cards.
- Integrated search capabilities allowing users to quickly locate specific cards. Also created a favorite feature allowing users to have easy access to their favorite cards.
